Firestone
BUILDING PRODUCTS

NOBODY COVERS YOU BETTER.™

Responsibility is at the heart of everything we do.

Firestone

- From raw material selection throughout the manufacturing process
- From availability and logistics to installation and warranties
- To our customers, including our contractors, installers, applicators and distributors
- To our end users, including building owners, home owners, engineers, specifiers, architects or landscape designers
- To our teammates and independent sales reps
- To the communities in which we live and work

And perhaps most importantly, to the environment

Trust your project needs to Firestone.

Firestone BUILDING PRODUCTS

Firestone Building Products manufactures a full line of roofing systems, insulation, and accessories to meet all commercial, industrial and institutional building needs. Large or small, new or re-roof, local or international, Firestone is a single-source manufacturer for quality single-ply EPDM and TPO roofing systems, modified bitumen systems, and metal roofing products, as well as a full line of standard and tapered polyiso insulation and roofing accessories. Firestone also offers a wide selection of eco-friendly green roofing options, including the Enviro-Ready™ Roofing System and Warranty.

Firestone METAL PRODUCTS

Firestone has one of the industry's broadest metal wall systems lines and provides a wide variety of colors that can be matched among systems, textures and materials. Our certified Contractor/ Partner Network strives to deliver quality, value and performance, and the Firestone Red Shield™ Vertical Wall System Warranty provides unprecedented protection in the industry for your building investment.

Firestone SPECIALTY PRODUCTS

Innovative projects require innovative products, like the liner and geomembrane systems from Firestone Specialty Products. From retention ponds that provide an aesthetic environment while managing stormwater, to bioswales and rain gardens that filter stormwater run-off into underground collection systems for use in above and/or below ground irrigation—Firestone Specialty Products is proud to be a part of the overall solution.

Firestone ENERGY SOLUTIONS

Firestone Energy Solutions is committed to providing products, systems and services that assist in the conservation and the production of energy for the building envelope. Through a comprehensive offering of rooftop photovoltaic and wind systems, Firestone is positioned to provide either turn-key or custom energy solutions to meet renewable energy demands.
