

Firestone CLAD-GARD™ Metal Roofing Underlayment

THE SMART WAY TO PROTECT YOUR METAL ROOFING INVESTMENT.

UNA-CLAD™ METAL ROOFING UNDERLAYMENT PRODUCTS

Firestone CLAD-GARD™ Metal Roofing Underlayment is the smart way to protect your metal roofing system investment. It provides an ideal moisture barrier between the roof deck and the adjacent metal system, is easy to install, and provides the confidence of a complete system that includes warranted Firestone Building Products components from top to bottom.

Unlike roofing felts, CLAD-GARD SA and MA underlayments are unaffected by water and can be left exposed for up to three months without the need for tarping.

FEATURES & BENEFITS

- **Skid-resistant surface**
CLAD-GARD underlayment offers good skid-resistance, even in challenging roofing environments. This means a safer, more secure surface for maintenance workers and other rooftop traffic.
- **Nail resealability**
CLAD-GARD underlayment is watertight around fasteners such as nails or other anchors.
- **Protection against corrosion**
CLAD-GARD underlayment can be an effective vapor barrier that helps reduce moisture beneath the metal and extend its life.
- **High temperature resistant**
CLAD-GARD MA, CLAD-GARD R, and CLAD-GARD SA-N (North) underlayments are heat resistant up to 230 °F (110 °C) without degradation of the material. CLAD-GARD SA-S (South) underlayment can live up to even more extreme temperatures; it resists temperatures as high as 250 °F (121 °C).

Firestone UNA-CLAD Metal Roofing Underlayment

CLAD-GARD MA UNDERLAYMENT

- Easy to carry and easy to fasten alternative to felts and self-adhered underlayments.
- Available in 10-square rolls that are 4' (1.2 m) wide. That means more square feet per roll and fewer seams.
- At only 31 lbs (14 kg) per roll, CLAD-GARD MA underlayment is much lighter than roofing felt.
- Lays flat and stays wrinkle-free, so you'll need fewer nails to fasten CLAD-GARD MA underlayment than felt underlayment.

CLAD-GARD R UNDERLAYMENT

- Self-adhering metal underlayment with salvage edge and split release backer for easy installation.
- High-temperature endurance to 230 °F (110 °C).
- Roll without a box to lessen waste on the job site.
- Safe, skid resistant surface for outstanding traction.
- 60-day window for exposure before covering.

CLAD-GARD SA UNDERLAYMENT

- Premium non-reinforced product that minimizes wrinkling. Easy to handle and apply.
- Available in a convenient 2-square roll (3' x 67') (.09 m x 20 m).
- During new installations adheres to wood without a primer.
- Adheres to multiple substrates, including KYNAR-coated metal.
- Heavy-duty adhesive is protected by a split-release plastic liner, which is easily removed for quick installation and placement of the underlayment.
