

Firestone Fluid Applied Metal Roofing Systems

Restore your metal roof and improve performance with the Firestone line of quality roof coating systems

Need to extend the life of your metal roof? Firestone Building Products Fluid Applied Metal Roofing Systems will restore your metal roof and improve building performance while saving you money. The Firestone elastomeric roof coatings are formulated with a 100% acrylic polymer that provides outstanding adhesion, excellent water protection and superior durability.

Features & Benefits

- High solid count allows for a uniform distribution
- Available in 5 and 55 gallon drums
- ENERGY STAR® approved product that will help dramatically reduce the roof's surface temperatures by up to 100 °F. This decreases the amount of heat transferred into the building and reduces peak cooling demands by up to 15%. (EnergyStar.gov)
- Provides a cost effective alternative to replacing your roof
- Available in 4 colors (White, Gray, Tan and Black) to improve the aesthetics and life of your building
- Potential Tax Benefits—Most roof coating jobs are deductible in the first year
- 10-Year Warranty

Firestone Fluid Applied Metal Roofing Systems

Protect your investment

Your building is an important part of your business operations and profit. Protecting your building with a roof that will stand up to weather, temperature variations, airborne pollutants and emissions is imperative, and replacing the roof can be expensive if there is a leak or damage. The Firestone Fluid Applied Metal Roofing System offers a family of products to extend the life of your metal roof.

Ease of Application - 3-step process

Step 1: Prep

Step 2: Seal

Step 3: Coat
